

### ABOUT GENFLOW BIOSCIENCES

**Genflow** is pioneering groundbreaking gene therapies in partnership with leading organizations in longevity and gene delivery, aiming to slow the aging process and preempt age-related diseases. Our goal is not only to reduce healthcare costs, but to alleviate the profound emotional and societal burdens of a fast-growing aging demographic.

### PROGRAMS

- 1. MASH (Pre-Clinical):** Clinical testing of experimental therapy on patients with MASH, formerly known as NASH, an age-related liver disease
- 2. WERNER SYNDROME (Pre-Clinical/Development):** Developing a therapy for Werner syndrome, a rare accelerated aging disease, by which SIRT6 messenger RNA delivers the gene to the skin
- 3. SARCOPENIA (Pre-Clinical/Development):** Program to prevent age-related loss of muscle mass
- 4. DOGS (Clinical Proof of Concept):** Clinical trial underway in aged dogs for prevention of age-related diseases and life extension
- 5. OPHTHALMOLOGY (Pre-Clinical):** Cornea and glaucoma programs.
