

PRESS RELEASE

24 April 2023

**Genflow Biosciences Plc**  
("Genflow" or "the Company")

**FINAL RESULTS**

Genflow (LSE: GENF) is pleased to announce its final results for the year ended 31 December 2022. The Annual Report is available to view on the Company's website at [www.genflowbio.com](http://www.genflowbio.com)

The Company will post the Annual Report to shareholders and provide notice for its Annual General Meeting in the coming weeks.

Genflow is a UK-based biotechnology company focused on longevity and the development of therapies to counteract the effects of aging and diseases associated with advanced age. It is the first longevity biotechnology company to list in Europe and seeks to be a reference company in the European longevity sector.

**About Genflow**

Genflow is a UK-based biotechnology company established in 2020. The Company is developing gene therapies designed to target the aging process and to reduce and delay the incidence of age-related diseases. This will be done through novel therapeutics targeting aging in humans by using adeno-associated virus ("AAV") vectors to deliver copies of the Sirtuin-6 ("SIRT6") gene variant that is found in centenarians into cells.

Its mission is to increase understanding of the factors that control and impact lifespan. Genflow researches, develops, and commercialises therapeutic solutions to lengthen health span, the amount of time we live in good health, creating biological interventions that enable longer and healthier lives. Genflow is dedicated to the development and commercialisation of novel therapeutics targeting aging in dogs and humans. By treating aging, Genflow can contribute to a decrease in healthcare costs and lessen the emotional and societal burden that comes with an aging population.
