Genflow Biosciences Plc

("Genflow" or "the Company")

Secures Two Research Grants from Belgium's New Technological Innovation Partnership

The Company (LSE:GNF) (OTCQB:GENFF), an emerging leader in the field of longevity research developing therapeutics that potentially halt or slow the ageing process is pleased to announce two significant new research programs in collaboration with Revatis SA and EXO Biologics, backed by substantial non-diluting and non-reimbursable research grants by the Government of Wallonia in Belgium. Funding for the two research programs, as part of the Wallonia Recovery Plan by the Walloon Government in Belgium, will be disbursed annually to the Company, contingent upon Genflow and its collaborators achieving specific, activity-based milestones. Continued receipt of the grants by Genflow is dependent on the parties meeting predefined criteria each applicable year.

Technological Innovation Partnership (ATMP)

The two research programs are a part of a broader innovation partnership that the Walloon Government has launched, dedicated to Advanced Therapy Medicinal Products (ATMPs). The partnership boasts a substantial budget of 81 million euros, a mix of 60% public funding and 40% private contributions from various companies, spread over three years. This initiative is a collaborative effort involving BioWin, the Health Cluster of Wallonia and the Public Service of Wallonia, representing a significant commitment to advancing medical research and development in the region.

Sarcopenia Research Program with Revatis SA

Genflow, together with Revatis SA, has launched a 3-year sarcopenia research program, generously funded by a grant totalling 1.34 million euros. Sarcopenia, the progressive loss of muscle mass and function associated with ageing, poses a significant health risk and affects the quality of life for millions of elderly people worldwide. This collaborative effort aims to expand and diversify Genflow's research pipeline, addressing this growing concern as the global population ages. The partnership will leverage both companies' expertise to develop innovative solutions and contribute valuable insights into the mechanisms of age-related muscle deterioration.

mRNA Delivery Research with EXO Biologics

Genflow and EXO Biologics have initiated a 3-year scientific program, supported by a grant of 1.55 million euros. The project focuses on the development of a novel mRNA delivery system using exosomes to encapsulate and transport Genflow's proprietary centenarian SIRT6 gene. This cutting-edge approach aims to harness the natural advantages of exosomes, such as enhanced stability, improved cellular uptake, reduced immunogenicity, minimal toxicity, natural cargo sorting and reduced off-target effects, among others. This endeavour not only demonstrates Genflow's momentum in

leading-edge research, but also holds the potential to revolutionize therapeutic interventions for Werner Syndrome, an accelerated ageing condition and holds great promise for a range of other age-related conditions.

Dr. Eric Leire, CEO of Genflow commented: "We are excited to embark on this exciting new research, which aligns with our quest to understand and alleviate the impacts of ageing. Launching both of these programs represents a strategic move to enhance our research capabilities, while contributing to the understanding of age-related conditions. Both of these strategic initiatives will strengthen Genflow's position at the forefront of ageing-related research, and its mission to improve the health and well-being of older adults."

The information communicated in this announcement is inside information for the purposes of Article 7 of Regulation 596/2014.

About Genflow Biosciences

Established in 2020, Genflow Biosciences Ltd is a UK-based biotechnology company, with R&D facilities in Belgium, developing and researching potential novel therapeutics that halt or slow the ageing process enabling society to live longer, healthier lives. Genflow Biosciences lead compound is GF-1002, works through the delivery of a centenarian variant of the SIRT6 gene which has yielded promising preclinical results. Genflow Biosciences expects to commence a clinical trial in 2024 to study the potential benefit of GF-1002 in non-alcoholic steatohepatitis (NASH) for which there are few or no-approved therapies. By treating ageing as a risk factor to disease, Genflow Biosciences aims to reduce the financial, emotional, and social costs of an ageing population.

About Revatis SA

Revatis SA is a biotechnology firm based in Luxemburg specializing in the collection,

production and storage of autologous muscle-derived mesenchymal stem cells (MdMSC) for immediate therapeutic use or storage for further processing. RevaTis technology is minimally invasive and offers benefits for generating a large number of autologous stem cells. Their expertise in sarcopenia research makes them a valuable partner in addressing muscle deterioration in the elderly.

About EXO Biologics

EXO Biologics is Belgian biotech company committed to developing biopharmaceuticals using Extracellular Vesicles (EVs). Their work in mRNA encapsulation and delivery is revolutionizing the approach to genetic and cellular therapies.

DISCLAIMER

The contents of this announcement have been prepared by, and are the sole responsibility of, the Company.

This announcement may contain forward-looking statements. The forward-looking statements include, but are not limited to, statements regarding the Company's or the Directors' expectations, hopes, beliefs, intentions or strategies regarding the future. In addition, any statement that refers to projections, forecasts or other characterisations of future events or circumstances, including any underlying assumptions, is a forward-looking statement. The words "anticipate", "believe", "continue", "could", "estimate", "expect", "intend", "may", "might", "plan", "possible", "potential", "predict", "project", "seek", "should", "would" and similar expressions, or in each case their negatives, may identify forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking.

Forward-looking statements include all matters that are not historical facts. Forward-looking statements are based on the current expectations and assumptions regarding the Company, the business, the economy and other future conditions. Because forward-looking statements relate to the future, by their nature, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. Forward-looking statements are not guarantees of future performance and the Company's actual financial condition, actual results of operations and financial performance, and the development of the industries in which it operates or will operate, may differ materially from those made in or suggested by the forward-looking statements contained in this announcement. In addition, even if the Company's financial condition, results of operations and the development of the industries in which it operates or will operate, are consistent with the forward-looking statements contained in this announcement, those results or developments may not be indicative of financial condition, results of operations or developments in subsequent periods. Important factors that could cause actual results to differ materially from those in the forward-looking statements include regional, national or global, political, economic, social, business, technological, competitive, market and regulatory conditions.

Any forward-looking statement contained in this announcement applies only as of the date of this announcement and is expressly qualified in its entirety by these cautionary statements. Factors or events that could cause the Company's actual plans or results to differ may emerge from time to time,

and it is not possible for the Company to predict all of them. The Company expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements contained in this announcement to reflect any change in its expectations or any change in events, conditions or circumstances on which any forward-looking statement contained in this announcement is based, unless required to do so by applicable law, the Prospectus Regulation Rules, the Listing Rules, the Disclosure Guidance and Transparency Rules of the FCA or the UK Market Abuse Regulation
