

ABOUT GENFLOW BIOSCIENCES

Genflow is pioneering groundbreaking gene therapies in partnership with leading organizations in longevity and gene delivery, aiming to slow the aging process and preempt age-related diseases. Our goal is not only to reduce healthcare costs, but to alleviate the profound emotional and societal burdens of a fast-growing aging demographic.

PROGRAMS

1. **NASH:** Clinical testing of experimental therapy on patients with NASH, an age-related liver disease in early 2025;
2. **WERNER SYNDROME:** Developing a therapy for Werner syndrome, a rare accelerated aging disease, by which SIRT6 messenger RNA delivers the gene to the skin; and
3. **SARCOPENIA:** Launching a new program to prevent age-related loss of muscle mass.

SIRT6 GENE:

Epigenomic regulator gene that widely regulates aging; considered to be a potential therapeutic target for the treatment of diseases. Patented variant of SIRT6 found only in centenarians

CENTENARIAN SIRTUIN 6 GENE (SIRT6)

MANAGEMENT

Tamara Joseph, Chair

Seasoned healthcare leader with extensive experience in both early-stage and commercial biotech companies.

Dr. Eric Leire, MD, MBA, Founder/CEO

Involved in biotech for over 30 years, he has held senior positions including CEO of publicly traded biotech companies (Nasdaq, OTC.QB,OMX.Nasdaq).

SCIENTIFIC ADVISORY BOARD

Dr. Vera Gorbunova, PhD

Co-Director, Rochester Aging Research Center;
Affiliation: **Weizmann Inst. of Science**

Dr. Eric Verdin, MD/PhD

CEO & President, Buck Institute;
Affiliation: **UCSF School Of Medicine**

Dr. Matthew Hirschey, PhD

Ass't Prof, Duke Univ. School of Medicine;
Affiliation: **American Heart Association**

Dr. Manlio Vinciguerra, PhD

Princ. Investigator, University of Liverpool;
Affiliation: **UCL**

Prof. Dr. Sven Francque, PhD

NASH expert;
Univ. of Antwerp

Prof. Mary Rinella, MD

NASH expert;
Univ. of Chicago Medicine
